

# ARK Care™

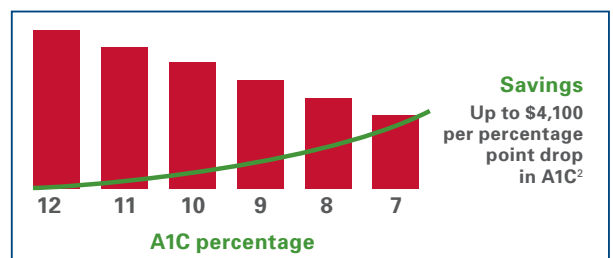

## REAL-TIME DIABETES MANAGEMENT SYSTEM

**ARKRAY'S solution for diabetes healthcare professionals offering real-time data management for effective patient care.**

## Outcomes Interactive Savings

ARKRAY's real-time data management system for people with diabetes, their management team and support circle. ARK Care has been shown to improve outcomes, lowering A1C by as much as 3 percentage points and an average of 2.2 percentage points<sup>1</sup> Arkray offers on-demand access to patient data through interactive viewing for the whole healthcare team. It has been shown every 1 point A1C reduction saves up to \$4,100 in annual healthcare costs and ARK Care documentation can help you receive your performance reimbursements.<sup>2</sup>

COMPLETEDIABETESSOLUTIONS™

INTERNET-BASED DIABETES MANAGEMENT SYSTEM

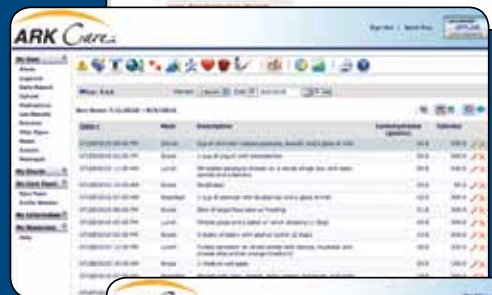

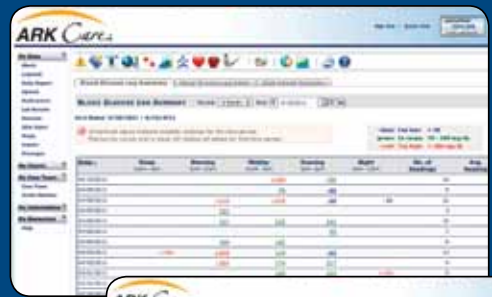

## A blood glucose tracking system that saves your time and resources.

- Internet access, HIPAA/HITECH compliant and FDA approved
- Personal profiles provide easy and secure access to patient data
- Allows healthcare team access to data on demand: MDs, RNs, CDEs, RDs, PharmDs and more
- Reports fulfill some pay-4-performance documentation and audit standards

### ARK Care can help you do much more than decipher blood glucose logbooks

- Easy and fast blood glucose meter uploading
- Real time data management, date and time stamps and time comparisons
- Effective graphs, charts and logbooks to give you the most information and real life data application for patients
- Track labs, oral medication, insulin, vitals and anthropometrics along with blood glucose readings
- Input diet, exercise and behavior change information
- Adjust treatment plans with enhanced patient data through a simple user interface
